SUSTAINABILITY TOUR: BIODIVERSITY

POLLINATOR-FRIENDLY PLANTS
All new landscape is required to include at least two plant types, which otherwise meet our reduced water requirements, that are considered Pollinators by The Pollinator Partnership (www.pollinator.org). A list of the pollinators used on our development projects can be found on page 68. We have no operational sites owned, leased, managed in, or adjacent to, protected areas or areas of high biodiversity value outside protected areas.

BEEHIVES
We helped our tenant Neuehouse install a beehive in their space at Columbia Square in Hollywood. Any beehives discovered in undesirable locations are to be relocated either on or offsite in partnership with local beekeeping organizations rather than destroyed.

BIRD SPECIES PROTECTION
We use a falcon to mitigate an unwanted pigeon issue in a more humane way as opposed to the use of spike-based bird deterrents on certain properties. Our falconer helps us identify protected bird species on these sites so that we do not inadvertently harm them.
